

summary

Based on the DivX® Compatible DVD Player with Ethernet Connection, DP-500, the KiSS DP-508 goes even further on the road of innovation. Like its

predecessors, this player reads all standard DVDs, DivX® 3.11, DivX® 4, DivX® 5 files along with XviD, MPEG-4, audio files like MP3 or standard Audio CDs, if connected to a Broadband Internet Connection it will even find the track names after the insertion of a music CD. JPEG pictures can also be viewed. Its Ethernet capabilities enables the KiSS DP-508 to read Audio/Video/Pictures files that are

currently located on a PC with KiSS PC-Link Software. Providing the user has a Boadband Internet connection Internet Radio with KiSS WebRadio can be played. But, the main new feature of this player resides in the addition of an 80 GB Hard Disk, enabling the user, to store Audio/Video/Picture files. These can be easily downloaded from a CD or from a PC on the DVD Player thanks to KiSS PC-Link.

Then a User Friendly list Interface permits the user to browse and choose among the stored file. Firmware updates are regularly posted on our web site, adding improvements and new features to the player. The KiSS DP-508 also comes complete with the standard CD/MP3, Ogg Vorbis, DivX®, XviD, CD-RW and DVD+-RW playback.

DVD Player with Ethernet and 80GB Storage Capabilities

KiSS DP-508

front and back

watch out for

HARD DISK

The KiSS DP-508 enables the user to store any audio/video/picture content on his Player thanks to the 80GB Hard Disk included in the Player. All these files are easily accessible through a User Friendly list displayed on the TV screen while the file transfer will be done on the Player from a list provided by KiSS PC-Link or from the player's drive.

BEST EVER DivX® COMPATIBILITY

KiSS DVD players play all DivX format. DivX® 3.11, DivX® 4 and DivX® 5. What does this mean for you? It means that now, for the first time, you can download full-screen, full-motion videos from the Internet that actually look and sound like what you get from your television or DVD player. With DivX® compression, you can download and watch high-quality video on your TV.

ETHERNET CONNECTION

The big new feature with KiSS DP-508 is the ethernet connection found on its back. The KiSS Player can be connected through different ways to allow all its features and services to run. It can be either connected directly to the Internet via a broadband connection or through a network (LAN) with a PC holding contents that can be read using KiSS PC-Link.

WEBRADIO

Thanks to its ethernet connection, the DP-508 is the only player on the market to provide users with a direct connection to the Internet. This internet connection enables the KiSS DP-508 to play internet radio. Just select this feature on the Player, and you will have access to a few thousand radio stations that can be streamed and played on the DP-508.

KISS PC-LINK

KiSS PC-Link is a software that enables the KiSS DP-508 user to play music, see pictures and view movies from a PC to the DivX compatible DVD player thanks to the ethernet connection found on the back of the player. KiSS PC-Link is a user-friendly software to install on a PC running at least Windows 98, it easy to select any media files on a PC's hard disk.

FIRMWARE UPGRADABLE

KiSS is keen in keeping a special relation with its customers, so, even after a player has been sold, its software and technology keeps moving. The firmware of the player keeps updated with the latest research and development and KiSS is able to release a firmware update on a regular basis. This latest firmware is available from our web site in the support section.
